

Configuramos el Proyecto

```
mkdir ~/video-intelligence  
cd ~/video-intelligence
```

configuramos las credenciales

```
export GOOGLE_APPLICATION_CREDENTIALS=~/video-intelligence/key.json
```

Creamos la cuenta del Servicio

```
SERVICE_ACCOUNT_NAME="video-intelligence-codelab"  
PROJECT_ID=$(gcloud config get-value core/project)  
SERVICE_ACCOUNT="$SERVICE_ACCOUNT_NAME@$PROJECT_ID.iam.gserviceaccount.com"  
  
gcloud iam service-accounts create $SERVICE_ACCOUNT_NAME
```

Creamos y bajamos la llave

```
gcloud iam service-accounts keys create $GOOGLE_APPLICATION_CREDENTIALS \  
  --iam-account $SERVICE_ACCOUNT
```

Verificamos

```
cat $GOOGLE_APPLICATION_CREDENTIALS
```
